### PROFILE

As an experienced Android developer with over 3 years of expertise in mobile application development, I possess a strong ability to develop Android applications that meet user requirements with exceptional functionality and user experience. I am highly adaptable and thrive in dynamic and challenging work environments where I can utilize my existing skills and knowledge while also developing new skills that contribute to the growth and success of the organization.

### WORK EXPERIENCE

#### Senior Engineer

June 2023 - till Date

#### QIBurst Technologies

- Leading the Android Project for **Grocery Outlet: Loyalty App**
- Working in 2 weeks of Sprint and following the Agile Methodology.
- Working on Braze Analytics Integration for enabling Content Cards, In-App messages, and Push Notification.
- Optimizing the app continuously, currently at 99.92% crash-free app.
- Product Search functionality.
- iOS and Android, unit/and functional tests.
- The app provides information on Offers, Deals, Weekly Ads, and Sweepstakes participation.

#### Software Engineer

#### IndiaNIC Infotech Limited

July 2021 - June 2023

- Work on building high-performance applications with all the latest Jetpack components. Also, bug fixing and improving application performance.
- Continuous learning and evolving to learn new technologies: Flutter for now
- I'm currently building an enterprise-level native Android application for the biggest grocery chain eCommerce platform in the US - **Grocery Outlet: Loyalty App** which operates as a chain of grocery stores. The company has more than 400 stores across the USA and more than 1.5 million shoppers hitting the aisles each week.
- Starting from scratch, creating a user-friendly, reliable, and highly functional app that offers a wide range of groceries to customers. Published on Play Store.
- I have worked on the **YOU app**, which is the largest multi-vertical eCommerce platform in the Kingdom of Bahrain. The app offers a diverse range of verticals including food, fashion, grocery, electronics, health, and beauty. In Play Store

#### Android Developer

#### PHP Poets Private Limited

June 2019 - July 2021

- Design and build advanced applications for the Android platform.
- I have contributed to developing the **Yolmate Mechanic App**, specifically the Yolmate Partner App. I was responsible for creating different layouts and integrating them into the app under the guidance of senior developers. The app is now available on the Play Store.
- I played a crucial role in developing the **Healthy Master** eCommerce app published on the Play Store. My responsibilities included creating a test app to understand the app's functionality, integrating APIs using the Retrofit REST client, implementing login and sign-up functionality, and adding cart and wishlist features with push notifications using Firebase. The app is now available for download on the Play Store.
- Worked and maintained, the **Alok School App** and **Indian Institute of Crafts and Design App**
- Worked on design and layout creation for **Jaipur Smart City Project: Parking Website Design**

#### Technical Writing

#### Medium

- I write about the latest technologies in which I work.
